

# Geoscience Services

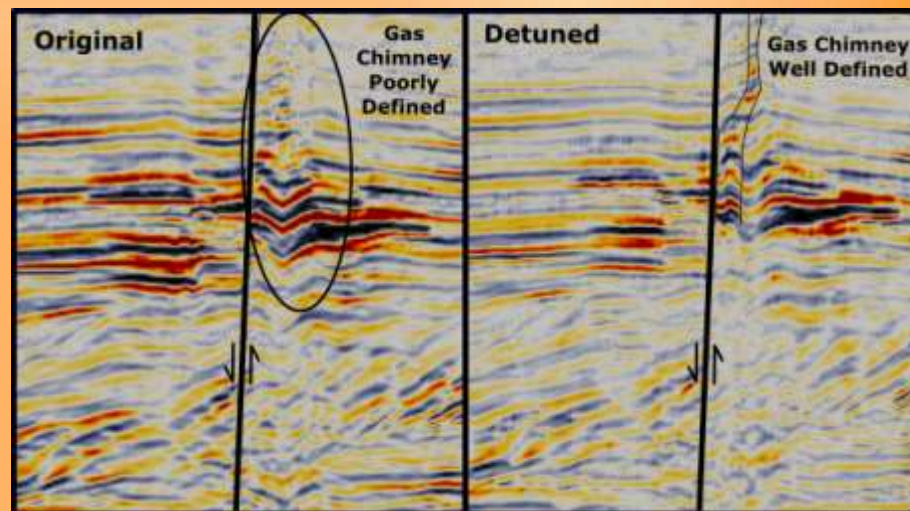

*Reliable studies, Better decisions*

ARK CLS offer a variety of services that can help you interpret your data more reliably. By improving and investigating your current data, we provide a low-risk, high-reward alternative to reshooting lines or hiring and training in house teams. Our Geoservices team can improve the usefulness of your existing seismic data.

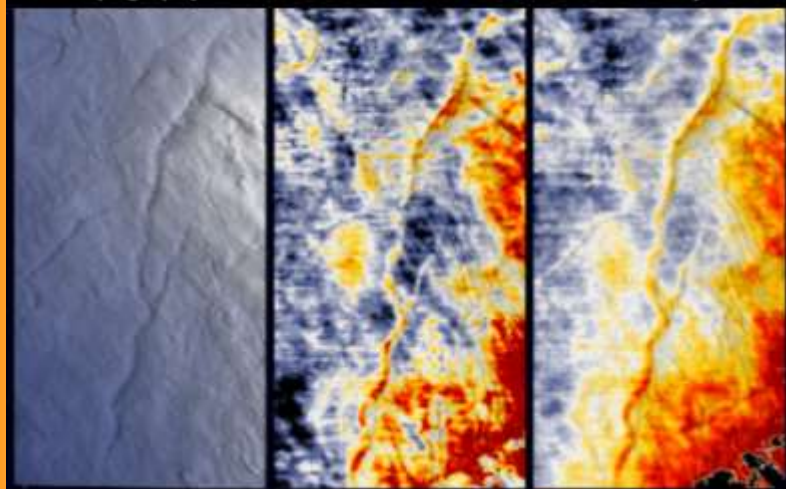

**Why not try our Pilot Study - if you're not happy with the results, you have nothing to pay!**

## SERVICES OFFERED INCLUDE:

- ❖ Coloured inversion
- ❖ Spectral shaping
- ❖ Broadband seismic
- ❖ Net pay maps
- ❖ 3DTune
- ❖ Integrated gravity magnetics

Topography      Net:Gross      Net Pay

## BENEFITS:

- ❖ Quantitative interpretation can be achieved from a relative inverted section
- ❖ Less uncertainty of deep structure
- ❖ 3D Net Pay exportable to any horizon
- ❖ Removes dangerous false DHI's
- ❖ Broader seismic spectrum without the cost of reshoot
