

# Workstation Access

*A plug-in for OpendTect which provides direct connection to OpenWorks® and GeoFrame\**

ARK CLS Workstation Access (WSA) plug-in for OpendTect provides a powerful facility to connect OpendTect to both OpenWorks and GeoFrame. Users can import and export various geoscience data quickly without using an intermediate transfer file. WSA uses robust inter-process connectivity tools developed by ARK CLS over many years.

## MAIN BENEFITS:

- ◆◆ Direct connection to core interpretation systems, GeoFrame and OpenWorks
- ◆◆ Allows Geoscientists to focus on work flows rather than wasting time on data handling
- ◆◆ Built using our powerful connectivity sub-systems

- ◆◆ Facilitates efficient workflow effort between different interpretation systems
- ◆◆ Easy to install, easy to use
- ◆◆ Available as a plug-in for OpendTect
